

Australian Government Procurement — AusTender Dataset

Source: AusTender OCDS API (api.tenders.gov.au/ocds) · Period: 1 Jul 2022 – 6 Apr 2026 (FY2023, FY2024, FY2025, FY2026 partial) · Scope: All Commonwealth agencies · Generated: 6 April 2026

INTRODUCTION

Australian Government procurement totals **\$227.0B** across 221,633 contracts from FY2023 to April 2026. The structure of that spend is highly concentrated: **514 contracts (0.2% by count) account for \$136.6B, or 60% of all value.** Understanding Commonwealth procurement means understanding a small number of very large awards.

Defence accounts for \$127.0B (56% of total spend), or 56 cents in every procurement dollar. Home Affairs (\$11.7B), Social Services (\$6.3B), and the two Health portfolios (\$13.5B combined) each represent credible standalone markets, though none approaches Defence's scale. Any contractor seeking Commonwealth revenue at scale must either hold a position in Defence or aggregate across multiple civilian agencies.

The contractor base reflects this structure. The top 20 spans defence platform primes (Austal, Hanwha, Boeing, Lockheed Martin, BAE Systems, Anduril), base and estate operators (Cushman & Wakefield, Spotless, Compass, Evolve FM, Ventia), fuel and logistics (Viva Energy, Toll), and enterprise IT (IBM, Accenture, Data#3). Adding FY2023 substantially reshapes the rankings: Lockheed Martin moves from 15th to 7th (\$1.28B in FY23 alone), BAE Systems enters the top 10 (\$1.04B in FY23), and IBM's \$858M FY23 spend exceeds its combined FY2025–FY2026 total. The Big Four consulting firms hold a combined \$2.0B across four years; Accenture (\$1.3B) leads with KPMG (\$650M) second.

Procurement method is the structurally significant finding for market access. 58% of contracts by count are limited tender: direct award to a single supplier with no open competition. Incumbency is the primary mechanism by which Commonwealth spend flows. A supplier without an existing Commonwealth relationship faces a structural barrier.

DATASET OVERVIEW

PROCUREMENT METHOD

The majority of Commonwealth procurement, by contract count, bypasses open competition entirely. 58% of contracts are limited tender: agency selects a supplier directly, no public market, no evaluation. The 42% that proceeds to open tender carries higher average contract values (\$1.31M vs \$814k for limited). Agencies reserve competitive process for their largest and most complex procurements. For most transactions, direct award is the default.

CONTRACT VALUE DISTRIBUTION

VALUE BAND	CONTRACTS	% OF TOTAL	TOTAL VALUE	% OF VALUE	% OF CONTRACTS % OF VALUE
Under \$80k	128,879	58%	\$4.0B	2%	
\$80k – \$500k	68,206	31%	\$15.6B	7%	
\$500k – \$5M	20,950	9%	\$29.5B	13%	
\$5M – \$50M	3,084	1%	\$41.3B	18%	
Over \$50M	514	<1%	\$136.6B	60%	

Procurement value is structurally top-heavy. **514 contracts (0.2% of the dataset) account for \$136.6B: 60% of all spend.** The 128,879 contracts under \$80k (58% by count) collectively represent \$4.0B, less than 2% of total value. Effective analysis of Commonwealth procurement begins at \$1M: the 13,952 contracts above that threshold account for \$200.1B, or 88% of total value.

TOP AGENCIES BY CONTRACT VALUE

#	AGENCY	CONTRACTS	TOTAL VALUE	% OF TOTAL
1	Department of Defence	87,511	\$127.0B	56%
2	Department of Home Affairs	5,526	\$11.7B	5%
3	Department of Health, Disability and Ageing	2,651	\$6.9B	3%
4	Department of Health and Aged Care	5,451	\$6.6B	3%
5	Department of Social Services	1,226	\$6.3B	3%
6	Department of Employment and Workplace Relations	4,764	\$6.1B	3%
7	Services Australia	6,588	\$6.0B	3%
8	Australian Taxation Office	3,255	\$4.8B	2%
9	DFAT – Australian Aid Program	1,340	\$4.5B	2%

#	AGENCY	CONTRACTS	TOTAL VALUE	% OF TOTAL
10	Dept of Climate Change, Energy, Environment and Water	7,897	\$4.4B	2%
11	Department of Foreign Affairs and Trade	7,668	\$4.2B	2%
12	Australian Federal Police	4,334	\$3.5B	2%
13	Department of Veterans' Affairs	7,520	\$3.4B	2%
14	Australian Signals Directorate	5,570	\$2.9B	1%

17	Jones Lang LaSalle (ACT)	1,184	\$327M	\$288M	\$456M	\$793M	\$1.9B
18	Compass Group Defence Hospitality	61	—	—	—	\$1.85B	\$1.9B
19	Ventia Australia	223	\$34M	\$476M	\$693M	\$402M	\$1.6B
20	DT Global Asia Pacific	88	\$637M	\$487M	\$323M	\$137M	\$1.6B

△ **Secure Journeys Pty Ltd (\$4.7B)**: two contracts with the Department of Home Affairs at this scale points directly to immigration detention or offshore processing services. At \$4.7B it ranks third on the contractor list, above Lockheed Martin, reflecting the cost structure of long-term detention operations. Requires separate categorisation in any defence-focused analysis.

FY2023 substantially reshapes the rankings. Lockheed Martin moves from 15th (prior three-year view) to 7th — \$1.28B in FY2023 alone reflects Joint Strike Fighter and missile system awards. BAE Systems enters the top 10 with \$1.04B in FY2023, driven by LAND 400 Phase 2 and ammunition supply work. Data#3 nearly doubles its prior ranking, with \$782M in FY2023 IT procurement (hardware resale and managed services across Defence and whole-of-government panels).

Highlighted rows are confirmed defence primes or sovereign capability entities. The top 20 includes base and estate operators (Cushman & Wakefield, Spotless, Compass, Evolve FM) and logistics providers (Viva Energy) accounting for more than \$15B across four years, representing the infrastructure of Commonwealth operations running in parallel to platform acquisition. Anduril Australia (\$2.0B, 13 contracts) is the most significant emerging entrant — \$1.9B of its total falls in FY2026, indicating a large platform award concentrated in the current year. DT Global Asia Pacific (\$1.6B) is primarily an Australian Aid Program contractor; its inclusion reflects the scale of DFAT-administered development spend.

CONSULTING & ADVISORY FIRM SPEND — ALL COMMONWEALTH AGENCIES

FY2023–FY2026 (partial to April 2026). * FY2026 partial only. † BCG FY2025 spike is 77% one \$99M DFAT Australian Aid Program contract. ‡ PwC Government Advisory rebranded as Scyne Advisory in October 2023; contracts awarded under the

shared ABN before October 2023 are attributed to PwC, after to Scyne Advisory.

\$5.3B over four years (FY2023–FY2026) to 13 named firms. The market is more stratified than the aggregate implies.

IBM leads by total value at \$1.6B, driven by an outsized FY2023 (\$858M) — more than its combined FY2025–FY2026 spend. This pattern reflects large multi-year platform awards booked upfront in FY2023, including Home Affairs border and identity systems and Defence IT infrastructure. The underlying run-rate is declining sharply year on year.

Accenture is the largest advisory firm at \$1.3B. Its FY2025 spike (\$622M) reflects major Health digital transformation platforms — it has moved decisively beyond Defence into health and social services portfolios. An average contract value above \$9M reflects systems integration scale, not advisory engagements.

KPMG leads by contract count with 968 engagements over four years at an average of

\$671k. The profile spans advisory, assurance, and project management across many agencies. Broad reach with a dispersed client base and no dominant account.

PwC (\$201M) and Scyne Advisory (\$93M) share an ABN — PwC Government Advisory rebranded as Scyne Advisory in October 2023. Contracts are split by award date: pre-October 2023 to PwC, post-October 2023 to Scyne. PwC's \$187M in FY2023 reflects the full weight of its government advisory practice before the restructure; the sharp drop in FY2024 (\$13M) marks the effective handover. Scyne's profile (\$19M FY24 → \$57M FY25) shows a practice rebuilding post-rebranding.

MBB penetration is negligible. McKinsey holds \$40M. BCG registers \$150M, of which 77% is a single \$115M DFAT Australian Aid Program contract (FY2025). Bain registers \$0.4M. Stripped of the BCG outlier, combined MBB spend over four years is approximately \$55M.

Cognizant's absence (\$50k, one contract) is informative. It operates below the AusTender threshold as a subcontractor, almost certainly inside IBM and Accenture programmes on major Commonwealth IT platforms. Its true exposure is invisible in this dataset and material in practice.

DATA LIMITATIONS

1. No subcontractor visibility

AusTender captures only the prime awardee. A \$500M systems integration contract may route through fifty subcontractors, none visible here. Supplier analysis based on AusTender alone structurally understates the market position of firms that operate predominantly as second-tier integrators. Cognizant is the clearest example: a minimal AusTender footprint alongside significant known Commonwealth activity through IBM and Accenture programmes.

2. Pass-through accounts must be excluded

The raw dataset's largest entry, **FMS Account Reserve Bank of Australia (\$23.3B across 160 contracts, FY2023–FY2026)**, is the US Foreign Military Sales channel: Australian government purchases of US-origin weapons systems (missiles, aircraft, electronic warfare) routed through the RBA. All pass-through entries are excluded from supplier analysis in this report.

3. Contract amendments carry valuation uncertainty

AusTender does not reliably link contract amendments to originals. A contract escalating from \$10M to \$50M through successive amendments may appear as multiple discrete records. Total spend per supplier can therefore be either understated (if the original record dominates) or overstated (if amendments are separately counted). Large infrastructure and managed services contracts, which attract frequent amendments, carry the highest valuation uncertainty in this dataset.

4. Commonwealth only — state procurement not captured

This analysis covers Commonwealth agencies exclusively. State procurement (Defence SA, state police forces, emergency services, and state-run defence precincts) operates on entirely separate registers. For companies active in the South Australian defence industry or seeking state-level contracts, a separate extraction from individual state portals is required.

5. Contract descriptions are deliberately uninformative

Titles such as "Support Services", "ICT Services", and "Labour Support Services" are standard across the dataset. The AusTender record alone cannot determine what was procured. Scope analysis requires cross-referencing tender documents (where published), ministerial disclosures, or industry sources. For sensitive contracts, particularly within Defence, descriptions are often deliberately opaque.

6. The \$80k threshold defines the floor of analytical relevance

Below the **\$80k Commonwealth limited tender threshold**, agencies procure direct with minimal process. The 128,879 contracts below that level are a record of routine operational activity. Filtering to contracts above \$1M yields 13,952 contracts covering \$200.1B (88% of total value), a dataset that is tractable, strategically meaningful, and where competitive dynamics operate.
